TOTAL	660	20

TERMS AND CONDITIONS OF ADMISSION

Basic condition of admission

The basic condition for admission to the bachelor's degree study (the first-degree study programme) is the full completion of secondary education or full secondary vocational education (Higher Education Act, No.131/2002 Coll. as amended). In the case of a foreign applicant or a student who completed secondary education abroad, the education is comparable to that completed by a school leaving examination in the Slovak Republic. An applicant who completed secondary education abroad shall submit, along with the application form or more precisely, no later than on the date of enrolment, the decision on the recognition of the certificate of completion of secondary education recognized by a relevant institution in the Slovak Republic.

Other conditions of admission

1. No entrance examination. The Faculty will accept applicants who meet the following criteria:

- applicants who passed the external part of their school leaving examination in mathematics or SCIO tests of general study prerequisites or mathematics with at least a 60% score,
- applicants from secondary grammar schools, secondary vocational schools, associated schools and academies who have reached the arithmetic mean of marks at the year-end report for the penultimate year of study (not the final year) up to 1.7 inclusive,
- applicants who are holders of official industrial certificates of CCNA level and higher,
- applicants who have obtained a certificate of successful completion of professional training courses organized by the Faculty,
- secondary school graduates who during their secondary school study were successful solvers of the Olympiads, Students' Professional Activities (SPA, *in Slovak SOČ*) or international and national competitions listed in the table below and participated in the regional or national round.

OLYMPIAD	COMPETITIONS	
	NAME	CATEGORY
Mathematics Physics Informatics Young accountant	NAG or NetRiders	UNI, PT
	First Lego League (FLL)	
	RoboCupJunior	
	ZENIT	Category A and B: Programming, Web, Microelectronics
	Students' Professional Activities (SPA)	02 – Mathematics and Physics, 11 – Informatics, 12 – Electrical Engineering and Hardware, 15 – Economics and Management
	Pangea, iBobor	
	Junior Internet	Web, App, Design, Learn
	Young physicists tournament	

Compliance with one of the conditions mentioned in a) to e) above is sufficient for admission without entrance examination.

2. Entrance examination

Other secondary school graduates who do not meet the conditions for admission without the entrance examination will be accepted on the basis of the result of the entrance examination in the order of the total number of points achieved until reaching the capacity of the Faculty. At the entrance examination, not only the knowledge in the scope of secondary grammar school mathematics curriculum but also the ability of general logical thinking is verified in the form of a test.

Applicants for admission to more than one study programme shall indicate their order of preference in the application form. In that case **only one payment of the admission fee is required**. If the applicant succeeds in the entrance examination, he/she will be admitted in the order of preference for the study programme whose requirements are met.

Terms of the admission procedure

After the application deadline, the Faculty sends an invitation to the entrance examination, which, in addition to detailed information on the course of the entrance examination, also contains the assigned identification code of the candidate and the number of the room in which he/she will pass the entrance examination. After registration and verification of compliance with the conditions under the provisions of Section 56 (1) of the Higher Education Act, the applicant passes a test in mathematics and logical thinking within a time limit of 120 minutes. Upon completion, the tests are scanned, evaluated automatically, and preliminary results are published on the day of the entrance examination on the website <http://vzdelavanie.uniza.sk/prijimacky/>. The candidate will gain access to his/her results by entering his/her surname and the identification code. After the conclusion of the admission procedure, the candidate is provided with, in addition to the result of the entrance examination, a complete assignment of the solved tests with indicated correct answers.

The Dean's office of the Faculty will deliver a written decision on the result of the entrance examination to the applicant within 14 days from the date of the entrance examination.

Language competence – written and oral command of Slovak or Czech; studying at the Faculty, including the possibility of passing some of its parts in higher grades abroad, requires the candidate's knowledge of at least one world language at least to the extent of the secondary school curriculum.

Health certificates – The Faculty does not require health certificates of medical fitness for university study and accepts applications without health certificates.

ADMISSION OF FOREIGN STUDENTS

The basic and other terms and conditions of admission are applicable for applicants from abroad as well as for applicants from Slovakia.

Foreign students who study in a foreign language (i.e. not Slovak), pay the tuition fee as stated in Section 92 (8) of the Higher Education Act. The tuition fee is specified by the UNIZA directive and published for the respective academic year on the University website. **Foreign applicants (except for applicants from the Czech Republic) who want to study in the state language are required to pass a Slovak language test with at least B1 level** *. The language test is carried out online on the day of the entrance examination and its successful completion is a condition for admission to study **.

* *Passing the language test may be waived for applicants who have obtained the required level of the Slovak language at a language school. The decision on the exemption from the language test is taken by the guarantor of the study programme on the basis of submitted certificate from a language school.*

** *In the case of non-admission to the study due to unsuccessful completion of the language test, the applicant may submit a request for review of the decision on the result of admission procedure, in which he/she undertakes to improve the language skills during the first year of study through successful completion of language training (a language school or the Slovak language course at UNIZA). In reviewing the decision, the secondary school study results and the results of entrance examination (or more precisely meeting the conditions for admission without entrance examination) will be taken into account.*

APPLICATION FORM

In the event that the applicant wants to apply for more than one study programme, it is satisfactory to submit one application form whereas only one admission fee payment is required.

The preference of individual study programmes is indicated by the order directly in the application form.

Applicants fill in the application form *Prihláška na vysokoškolské štúdium – 1. stupeň* (*Application form for the first degree of the university study*) or they can also use an electronic application form. The electronic application form can be filled via the UNIZA website: <https://vzdelavanie.uniza.sk/prijimacky/> or on the Portal VS (University Portal): <https://prihlaskavs.sk/sk/>. In the case of electronic application form it is necessary to follow instructions as specified in the system of Electronic Application Form.

Attachments to the bachelor's degree application form:

- curriculum vitae,
- proof of payment of the admission fee,
- another attachment to prove compliance with the relevant condition for the admission without an entrance examination.

Admission fee:

EU citizens **€ 20**

Non-EU citizens **€ 50**

To be sent to:

Žilinská univerzita v Žiline, Univerzitná 1, 010 26 Žilina

Bank: Štátna pokladnica

IBAN: SK96 8180 0000 0070 0026 9909

Const. symbol: 0308

Variable symbol: 10531 – bakalárske štúdium

Payment method:

payment can be made by bank transfer or postal order to the above account.

Proof of payment:

in the case of traditional application form the proof of payment is to be sent to the Faculty address with the application form; in the case of an electronic application form the scanned copy of the proof of payment is to be uploaded to the system of Electronic Application Form.

With payment of the admission fee from the EU member states, the EES countries, territories that are considered a part of the EU (Treaty of Rome, Section 299) and SEPA countries, it is necessary to use **BIC: SPSRSKBAXXX, IBAN: SK96 8180 0000 0070 0026 9909**. In the event of non-participation in the admission procedure or a failure in the admission procedure, the Faculty does not refund the admission procedure fee.

USEFUL DATES

Open Day	ONLINE ² Open Day	Deadline for submitting the application form	Entrance exams
16 February 2023 from 10:00 a.m.	9 November 2022 from 4 p.m. to 9 p.m. 15 March 2023 from 4 p.m. to 9 p.m.	until 31 March 2023	8 June 2023

² ONLINE Open Day takes place online via the application located on the website of the Faculty <http://www.fri.uniza.sk>.

ACCOMMODATION

The accommodation facilities of the University of Žilina provide accommodation according to the accommodation capacity, taking into account the distance between the student's permanent residence and the seat of the University. **Monthly accommodation fee: € 41 – € 61.**

CATERING

Students can use the services of the catering facility of the University of Žilina. **Price for food: € 1.60 – € 4.20.**

SCHOLARSHIPS

Students of all study programmes can obtain motivational scholarships (for excellent results or exceptional achievements) in accordance with the stated criteria. **Students of study programmes Informatics, Informatics and Management, Information and Network Technologies and Computer Engineering can obtain motivational departmental scholarships in accordance with the stated criteria.**

FOLLOW-UP STUDY AFTER COMPLETION OF BACHELOR'S DEGREE STUDY

There is a possibility for continuing bachelor's degree study within follow-up master's (engineering) degree study programmes at the Faculty of Management Science and Informatics at UNIZA in the academic year 2023/2024 – **Applied Informatics, Biomedical Informatics, Intelligent Information Systems, Applied Network Engineering, Information Management, Computer Engineering** (respective information about study programmes can be found on the University website). After the completion of the bachelor's degree study, it is necessary to verify the current offer of study programmes in a particular academic year.

ADDITIONAL EDUCATIONAL ACTIVITIES

As part of their coursework, the students of the Faculty have the opportunity to prepare for the Cisco Certified Network Associate industry certifications free of charge under the auspices of the Networking Academy. The latter has been successfully operating at the Faculty for 20 years and in 2015 it was awarded as the best academy in providing CCNP courses in the Central Europe region (Europe-Central/Russia/CIS Recipients) and received the CCNP Academy Curriculum Excellence Award. The Faculty also runs a similarly focused Juniper Academy and, in the area of network security, a Fortinet Academy. The students of the Faculty thus have the opportunity to obtain globally recognized certificates (CISCO CCNA/CCNP, CompTIA+, Juniper JNCIA/JNCIS, Fortinet NSE and others). The students of the Faculty can also obtain an academic certificate Introduction ADOIT. ADOIT is a tool for managing corporate IS/ICT. The students of the Faculty complete various internships and study stays or participate in various international competitions. After graduation, the graduate gains sufficient knowledge to start his/her own start-up business, too.

GRADUATE PROSPECTS

BACHELOR'S DEGREE STUDY PROGRAMMES

INFORMATICS

(Field of study 2508 Informatics)

Graduates of the bachelor's degree study programme acquire basic knowledge of informatics. They are able to work with software of information systems of businesses, to participate in its creation and implementation; they also gain knowledge of how to run a business. They are employable in all sectors of industry, in public administration, in the private sector and as independent entrepreneurs. The study programme prepares professionals who master computer technology and know how to apply modern information technologies, and it creates conditions for their further qualification growth in the field of informatics within the framework of the master's (engineer) degree study.

INFORMATION AND NETWORK TECHNOLOGIES

(Field of study 2508 Informatics)

The study programme enables the students to become a specialist in the field of information and network technologies with a wide range of practical knowledge that can be applied in the workplace. The graduate of the study programme gains knowledge in the field of computer systems architectures, circuitry solutions, fixed and wireless networks, security and

safety of computer communication, principles and management of operating systems, solutions of virtualization and clouds, general and special programming techniques. The graduate masters not only the latest technologies but he/she is also ready to adapt quickly to the emerging technologies. The graduate understands the principles and theoretical foundations of the field and is able to apply them creatively in practice. He/she is ready to develop non-traditional ICT applications and implement new technologies in the field of computer systems and networks. The graduate is prepared for the development of non-traditional ICT applications and the implementation of new technologies in the field of computer systems and networks. The study programme is designed to provide students with the possibility to select the course from a wide range of courses belonging to the whole field of computer systems and networks, and profile themselves into one of two offered specializations: network technologies or information technologies.

INFORMATICS AND MANAGEMENT

(Field of study 2508 Informatics)

Graduates of the study programme acquire the necessary knowledge of informatics. They are able to participate in the program implementation and operation of information systems in economic objects at all levels of management. They gain knowledge especially from the field of informatics, but also to the necessary extent in the field of business management with the use of modern information technologies, thus they can flexibly adapt to the requirements of the labour market, or independently run a business in the field of informatics. This knowledge enables them to work, for example, such as a programmer able to implement projects of information systems; a programmer of WWW applications of corporate intranets; an IT engineer –consultant able to work on solving IT problems in companies.

MANAGEMENT

(Field of study 6213 Economics and Management)

Graduates of the bachelor's degree study programme Management acquire key knowledge, skills and competences in the field of management disciplines. They are employable as senior employees (managers) at lower and middle level management of both production and non-production organisations. They become qualified professionals able to analyse existing problems in the management systems of organisations, prepared to creatively design their solutions, able to improve and optimise processes in organisations in order to create new values and achieve synergies and strategic competitive advantages.

COMPUTER ENGINEERING

(Field of study 2508 Informatics)

Graduates of the bachelor's degree study programme Computer Engineering are prepared to continue their study in the master's (engineering) degree of higher education. They can be employed at various levels of management in companies focused on the design, development, implementation and operation of information technologies, in industrial enterprises, in the educational system, in banking sector, transport, healthcare, ecology, etc. They are able to implement, install and operate business systems, work in an implementation team, expand, adapt and localize computer and information technology systems. They are able to cooperate with system users and specialists of other professions. They are employable in the development of digital systems based on microcomputers and programmable circuits that allows them to work also in the position of developers, designers or technologists.
