

## Horizon Europe Novelties

### Webinar for the University of Zilina

18 March, 10:00 – 11:15

The start of [Horizon Europe](#), the new EU Framework Programme for Research and Innovation, is approaching and it is the right time to get ready! Horizon Europe builds on the achievements and success of the Horizon 2020 programme and with the increased budget and bigger ambitions aims even higher. Even though the programme has been designed to evolve and not change significantly, some new features and schemes will be introduced.

The short tailored-made webinar for the University of Zilina will provide an overview of the Horizon Europe programme and its novelties. The participants will be also given the most important implementation measures in different ways and at different parts of the project life-cycle, from the design of the work programmes to the expected novelties in financial provisions in Horizon Europe projects.

The webinar will take place on 18 March 2021 from 10:00 – 11:30

To join the webinar, please register [here](#) by 17 March
