

We are a worldwide leader in the design, engineering and manufacturing of acoustic and thermal components and systems in the automotive sector.

Adler Pelzer Group

The **Adler Pelzer Group** is a worldwide leader in the design, engineering and manufacturing of acoustic and thermal components and systems for the automotive sector. With more than 15,000 employees and approximately 100 manufacturing facilities, we deliver to all major car brands globally.

As part of our Organizational Development activities, we are launching a “**Global Graduates Program**” to develop new talent for our organization.

Launched in Europe, US, South America and potentially Asia, the Program foresees a period of four to five years training within various business functions and possibly different countries.

This requires a high degree of flexibility and mobility from you as a potential candidate.

Global Graduates Program
